

NOTIFICATION TO CHEMICAL PRODUCT/WASTE SUPPLIERS OR TRANSPORTERS

Business Name: _____
Address: _____
_____, Indiana

Marion County Wellfield Protection Information

The _____ located at _____, **Indiana** is situated within a designated Marion County Wellfield Protection Zone. As such, the use, storage and management of chemical products or the generation of wastes that can potentially contaminate the underlying groundwater is closely monitored and controlled within this area to protect the City's drinking water supplies. As a supplier and/or transporter of chemical products or wastes to or away from the facility, you are being made aware of the sensitivity of this area in order to exercise an added degree of care and precaution in completing your work activities. The following restrictions shall apply:

1. Personnel involved in the delivery and transport of products or materials to or away from the site shall have proper training in handling of chemical product or waste spills.
2. During delivery or transport, any liquids or solids that could potentially become groundwater contaminants shall be properly sealed in appropriate containers and handled to prevent accidental leakage or spillage.
3. In the event of a chemical or waste spill or discharge, personnel shall immediately implement the required spill prevention plan in effect for the activity.
4. The appropriate state and local regulatory entities shall be notified of the spill or release.

Please indicate your understanding and acceptance of the requirements of this notification by signing below and returning a copy of it to the facility manager for documentation.
